Coordinates are good to within 10" (B$\mu(0)$ $\leq$24.5 mag/arsec^2) or 20" (B$\mu(0)$ $\geq$24.5 mag/arsec^2).

Table 2: Derived information on all galaxies with central surface brightness $\geq$22.0 B$\mu(0)$ except for the fields taken 10/26/95-10/30/95. See section 5.
